TEACHING NUMERACY

This practical, teacher led, course will give delegates a toolkit of activities and examples to support the development of numeracy in their teaching.

Numeracy is often considered the responsibility of the mathematics teachers but, as a life skill, every teacher should be aware of how to support students development in numeracy. Delegates will explore numeracy in real contexts – shopping, cooking, building, finance etc and will see how small activities can be built into all curriculum areas to support numeracy.

COURSE CONTENT

- Why numeracy isn't mathematics
- Understanding numeracy in context
- Continual, informal numeracy assessment in lessons
- Making de-coding fun – the literacy numeracy cross-over
- Using numeracy as a predictive learning tool

**THIS COURSE CAN ALSO BE RUN IN SCHOOL FOR ALL RELEVANT STAFF.
CONTACT THE OFFICE FOR MORE DETAILS.**

We hope that you enjoy your day and find your new skills useful upon your return to school.
